Boice, Jay, and Nate Silver. "2022 World Cup Predictions." FiveThirtyEight, 18 Dec. 2022, https://projects.fivethirtyeight.com/2022-world-cup-predictions/.

Why should you care about this data?

This data is important to me because it shows all the stats for the 2022 World cup predictions. You can see through at the tournament on what chances each team had going into the tournament and after each game through out the tournament. Also, showing the amount of goals that have been scored for each team. Showing what team has the best offense and defense in the tournament as well. Which is really important for other teams and fans to understand as well.

Columns of Data

sim_wins to see the amount of wins in the data set

sim_ties to see the amount of ties in the data set

sim_losses to see the amount of losses in the data set

Group column to see what group each national team is under

Team is the team names of each nation in the world cup

sim_goal_diff is the goal differences between each game

goals_scored which nations scored
